

6516205282.txt

I urge rejection of NAB's petition 04-160. There is essentially nothing on local radio of interest to me. Satellite radio is the first opportunity I have to by-pass the dominance of kiddy-radio and hear what I enjoy regardless of location. I wish to go directly to my desired content such as news, weather, traffic and more without having to painfully wait for it to appear between the noise.
Thank you, Indy Crowley
